Profile Summary

Full-Stack Developer with 11 Months of production experience building scalable web applications using the MERN stack, PostgreSQL, and GCP. Proficient in REST API design, JWT authentication, RBAC, and LLM integrations using Google Gemini API. Delivered end-to-end systems including an in-house HRMS platform and an AI-powered document intelligence tool. Achieved top-2 finishes at IIT Delhi Tryst Hackathon and SGT University Code Sangam 50 teams. B. Tech in AI from Gurugram University.

Experience

Cache Digitech Pvt. Ltd *August 2025 – Present*

Web Developer/ IT Cloud Trainee *Delhi*

- Architected and shipped the company's official website from scratch, replacing a legacy WordPress system with a full-stack React + Node.js application — improving page **load time by ~65%** and cutting CMS licensing costs.
- Designed and built an in-house HRMS platform (React.js, Node.js, Express.js, PostgreSQL) currently serving 150 employees, managing onboarding workflows, attendance, and internal operations end-to-end.
- Implemented Role-Based Access Control (RBAC) with **3 user tiers** (Admin, HR, Employee), reducing unauthorized data access incidents to zero since deployment.
- Developed and maintained **17 RESTful API endpoints** covering authentication, employee management, onboarding, and internal operations — all secured with JWT.
- Provisioned and configured GCP cloud infrastructure for production-grade application hosting.

SalesQueen Software Solution Pvt. Ltd. *March 2025 – May 2025*

Full Stack Developer *Remote*

- Developed and maintained 3 full-stack modules using CodeIgniter 4, improving feature delivery velocity for a live production SaaS serving 1 client.
- Optimized MySQL queries and schema design for high-traffic tables, achieving 35% reduction in average query response time on core reporting features.
- Resolved 25 production bugs and contributed 8 new feature endpoints, improving system reliability and reducing client-reported issues week-over-week.

Projects and Contributions

DeepDoc — AI-Powered Document Intelligence Platform | React.js, *Node.js, PostgreSQL, MongoDB, Google Gemini API, GCP, Vercel*

- Built an AI document intelligence platform using Google Gemini LLM with structured prompt engineering to analyze, summarize, and extract structured insights from large documents — reducing manual review time by an estimated ~60% for target users.
- Engineered a secure RESTful API layer (Node.js + Express.js) with JWT authentication and RBAC for multi-user data isolation, backed by a hybrid storage strategy — PostgreSQL for relational metadata, MongoDB for unstructured document content.
- Deployed the full-stack application on GCP + Vercel + Render with environment-specific configs, optimized production builds, and CI/CD via GitHub Actions — achieving 99%+ uptime in production.

Deep Packet Inspection | *Python, NFStream, React.js, WebSocket, MySQL*

- Built a real-time DPI system using Python (NFStream) and React that detects and classifies 5+ network application protocols — including DNS, TLS, HTTP, and LLMNR — replacing basic IP logging with actual application-layer visibility.
- Engineered a full-stack monitoring dashboard with MySQL-optimized queries achieving sub-second response on ~1K+ daily flow records, featuring live WebSocket updates and employee-to-IP mapping for enterprise network observability.

Skills

- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, JavaScript (ES6+)
- **Backend:** Node.js, Express.js, REST API, JWT, RBAC, Python, Microsoft Azure AD SSO, Java
- **Databases:** PostgreSQL, MongoDB, MySQL, Redis, Milvus, ChromaDB
- **Cloud & DevOps:** GCP (Cloud Run, Cloud SQL, Compute Engine), GitHub Actions, Docker (basic), Linux, GitHub Action (CI/CD)
- **Testing & Tools:** Postman, Jest (basic), Git, GitHub, Razorpay Payment Integration
- **AI/ML:** Google Gemini API, Prompt Engineering, LLM Integration, Groq API, RAG
- **Core CS:** Data Structures & Algorithms, OOP, System Design, DBMS, OS, Computer Networks

Education

Gurugram University *2021 - 2025*

Bachelor of Technology in Specialization in AI *Gurugram, Haryana*

Achievements

- **IIT Delhi Tryst Hackathon**: Secured **2nd place** among **200**+ teams for a Health Tech project focused on Building AI chatbot focus on knowledge of Ayurveda for the users, with Optimized UI so that easily interact and get answer to their disease using Ayurveda.
- **SGT University Code Sangam (36-hour):** Awarded **2nd** place for an innovative Health Tech solution — one of 50 competing teams.
